*Flu shots and vaccines may not be available in all pharmacies at all times. Call for availability and to make an appointment, if needed. Most vaccines require a prescription (except for the flu shot). The flu shot and many vaccines to treat common illnesses are generally covered under the Affordable Care Act by non-grandfathered group health plans and non-grandfathered individual and group health insurance coverage typically with no cost sharing if provided by an in-network provider, consistent with specified dosage limits and satisfaction of age and other vaccine specific requirements. Other restrictions may apply. Check with your health plan if you have any questions about your benefits.
