Work Experience

Metal Fabricator

Kuhn North America-Brodhead, WI

April 2024 to August 2024

- Fabricated metal components and structures according to blueprints, drawings, and specifications
- Operated various tools and equipment such as shears, saws, drills, grinders, and welding machines
- Performed accurate measurements and calculations to ensure precise fabrication
- Interpreted technical drawings and schematics to determine project requirements
- Cut, shaped, bent, welded, and assembled metal pieces using appropriate techniques
- Inspected finished products for quality assurance before delivery or installation
- Collaborated with engineers and designers to develop efficient fabrication processes
- Maintained a clean and organized work area to ensure safety standards were met
- Adhered to all safety protocols while handling materials and operating machinery
- Troubleshoot issues during the fabrication process to identify solutions quickly
- Completed projects within specified deadlines while maintaining high-quality standards
- Collaborated with team members on complex projects requiring multiple fabricators

Shipping and Recieving

Medi-Rents & Sales, Inc.-Rosedale, MD

April 2021 to February 2024

- Maintained accurate inventory records by conducting regular cycle counts and reconciling discrepancies
- Picked and packed orders with high attention to detail, ensuring accuracy in product selection and packaging
- Received incoming shipments, inspected contents for damage or defects, and verified quantities against purchase orders
- Utilized computer systems to track inventory levels, update stock locations, and generate shipping labels
- Collaborated with team members to optimize workflow efficiency and meet daily production goals
- Performed quality control checks on outgoing shipments to ensure products met customer specifications
- Assembled product components using hand tools or machinery as required by job instructions
- Maintained a clean and organized work area to promote safety and productivity
- Assisted in the training of new warehouse employees on proper procedures for handling materials and operating equipment
- Demonstrated strong problem-solving skills by resolving inventory discrepancies quickly and accurately

Stay at home parent for these years

August 2019 to March 2021

Packaging Machine Operator

Axium Foods, Inc-South Beloit, IL

June 2016 to October 2017

- Operated and maintained packaging machines, ensuring efficient and accurate production of goods
- Monitored machine operations to detect malfunctions or errors, promptly resolving issues to minimize downtime
- Performed routine maintenance on machines, including cleaning, lubricating, and replacing parts as needed
- Adjusted machine settings to achieve desired product specifications and quality standards
- Inspected finished products for defects or inconsistencies, taking corrective actions when necessary
- Collaborated with team members to ensure smooth workflow and timely completion of production goals
- Maintained accurate records of production data, including quantities produced and materials used
- Followed safety protocols and procedures at all times to maintain a safe working environment
- Managed inventory of packaging materials, notifying supervisors when supplies needed replenishment
- Troubleshoot equipment issues using technical knowledge and problem-solving skills to minimize disruptions in production flow
- Investigated root causes of machinery failures or malfunctions; implemented corrective actions accordingly

Installer/Technician

Ciminos office system specialists-Middle River, MD

June 2014 to October 2016

- Installed modular furniture systems in commercial office spaces, ensuring proper assembly and alignment according to blueprints and design specifications
- Coordinated with delivery teams to receive and inspect modular furniture shipments, verifying accuracy of orders and reporting any damages or discrepancies
- Utilized hand tools, power tools, and equipment to assemble modular furniture units accurately and efficiently
- Performed quality checks on completed installations to ensure adherence to safety standards and customer satisfaction
- Troubleshoot issues during the installation process, making adjustments or repairs as needed to ensure proper functionality of the furniture systems
- Maintained a clean work area throughout the installation process, minimizing disruption to other workers or occupants in the space
- Communicated effectively with clients or end-users regarding any specific requirements or preferences for their modular furniture installations
- Provided training and guidance to junior installers on proper techniques for assembling different types of modular furniture systems
- Assisted in troubleshooting complex technical issues related to electrical connections within integrated modular workstations

Education

High school diploma

Parkville High & Center For Math/Science - Baltimore, MD

August 2011 to May 2014
